P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Your Petitioner, the University of Southern California, having its principal place of business at University Park, Los Angeles, CA 90007, represents that it is the owner of the entire right, title, and interest in and to U.S. Patent Application Serial No. 10/712,584 (the above-captioned patent application), filed November 12, 2003, which is a continuation of U.S. Patent Application No. 09/591,552, filed June 8, 2000, by virtue of an Assignment filed and recorded on October 26, 2000, on Reel/Frame 011207/0108, in the United States Patent and Trademark Office, evidence of recordation of which is attached hereto as APPENDIX A. Further, your Petitioner represents that it is the owner of U.S. Patent No. 5,814,609, which issued on U.S. Patent Application No. 08/745,603, filed November 8, 1996 by virtue of an Assignment recorded on January 8, 1997, on Reel/Frame 008352/0072, in the United States Patent and Trademark Office, evidence of recordation of which is attached hereto as APPENDIX B.

Your Petitioner, the University of Southern California, hereby disclaims the terminal part of the term of any patent granted on the above-captioned patent application which would extend beyond the full statutory term, as shortened by any terminal disclaimer, of U.S. Patent No. 5,814,609, and hereby agrees that any patent so granted on the above-captioned patent application shall be enforceable only for and during such period that the legal title to U.S. Patent No. 5,814,609 shall be the same as the legal title to any patent granted on the above-captioned patent application, this agreement to run with any patent granted on the above-captioned patent application and to be binding upon the grantee, its successors or assigns.

In making the above disclaimer, Petitioner does not disclaim any terminal part of any patent granted on the above-captioned patent application, prior to the full statutory term of U.S. Patent No. 5,814,609 as defined in 35 U.S.C. §§154-156 and 173, in the event that U.S. Patent No. 5,814,609 expires for failure to pay a maintenance fee, is held unenforceable or is found invalid in a final judgment by a court of competent jurisdiction, is statutorily disclaimed in whole or terminally disclaimed under 37 CFR §1.321(a), has all claims canceled by a reexamination certificate or as a result of an interference proceeding, or is otherwise not deemed to provide the rights conveyed by 35 USC §154, prior to the full statutory term of U.S. Patent No. 5,814,609 as defined in 35 USC §§154-156 and 173, except for the separation of legal title stated above. Further, Petitioner does not disclaim any terminal part of a patent granted on the above-captioned patent application that would extend beyond the present termination of U.S. Patent No. 5,814,609, in the event that such present term is extended by virtue of compliance with the conditions for term extension of any present or future patent term extension provisions of the patent law, including but not limited to 35 U.S.C. §§155, 155A or 156, and without waiving Petitioner's right to extend the term of a patent granted on the above-captioned patent application to the extent provided by law.

The undersigned, being the Attorney of Record for the above-captioned patent application, and duly authorized to act on behalf of Petitioner, certifies that he has reviewed the recordation evidence attached as APPENDICES A and B, and to the best of his knowledge and

belief, legal title to the above-captioned patent application and U.S. Patent No. 5,814,609 rests with Petitioners, the University of Southern California. The undersigned declares that all statements made herein of his own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001, Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the above-identified application or any patent issuing therefrom.
